This information is for general guidance only and should not replace clinical judgement. If you are unsure, seek TVN advice. For further product information, please refer to the Instructions for Use enclosed with the product. For Biatain Silicone and Biatain Silicone Ag conformability may vary across product design.

"The skin can within a short period of time be significantly damaged due to unwanted wound exudate, which can delay wound healing.

This means that absorption of exudate is the most essential for me as a patient"

Flemming, wound patient, Denmark
