Your step-by-step guide to using Peristeen® Plus For paediatrics

Getting ready

2. *Green temperature indicator* suggests you can start irrigation.

Empty the bladder before irrigation

2. Attach the grey connector to the grey lid on the water bag. Turn clockwise to lock.

3. Attach the turquoise connector to the control unit and catheter. Turn clockwise to lock.

4. Turn the dial to the Turquoise water symbol and pump carefully until the water fills the catheter pack. This will make the catheter smooth. Count slowly to 10 three times.

Note: The catheter packaging

Inserting the catheter

5. Turn the dial to the **White balloon symbol**. Don't pump yet!

6. Hold the catheter by the finger grip under the turquoise dot. Insert it slowly into your bottom, leaving the finger grip outside of your body.

While you hold the catheter in place, *pump air into the balloon*.

recommended by your Healthcare Professional:

Amount of pumps

(Max 2 using small catheter, or 4 using regular catheter.)

With air in the balloon, the catheter should stay in place on its own.

Gently pull the catheter back to seal off the bottom.

Do not use force when inserting the catheter. If you feel any resistance, stop and contact your Healthcare Professional or Coloplast Charter.

Pumping water Removing

7. Turn the dial to the Turquoise water symbol and slowly pump in the water. Volume of water recommended by your

pass the **Grey deflate** symbol as the balloon will deflate and the catheter may fall out.

8. When the recommended amount of water is pumped, turn the dial to the Grey deflate symbol to deflate the

Emptying

9. Wait patiently until poo passes into the toilet.

Sometimes water and poo come out An activity, like playing a game or watching
